

Riser Rail Kit

SF1231CP

Installation and Maintenance Instructions

In this procedure document we have endeavoured to make the information as accurate as possible.

We cannot accept any responsibility should it be found that in any respect the information is inaccurate or incomplete or becomes so as a result of further developments or otherwise.

Introduction

This installation guide has been produced for the SF1231CP riser rail kit. These instructions cover the installation, operation and maintenance. Please read the enclosed instructions before commencing the installation of this product, please note;

We recommend that the installation of any Twyford product is carried out by an approved installer.

Check Contents

Before commencing remove all components from packaging and check each component with the contents list.

Ensure all parts are present, before discarding any packaging. If any parts are missing, do not attempt to install your Twyford riser rail until the missing parts have been obtained.

Dimensions

Components

Item	Qty	Component	Item	Qty	Component
1	2	Wall Bracket	7	1	Rail
2	2	Cover	8	1	Handset
3	1	Flexible Tidy	9	3	Sealing Washers
4	1	Handset Holder	10	1	1.5m Flexible Hose
5	2	M4 x 64 Screw & Plug	11	1	Flow Regulator
6	2	Rail Cap			

Slide Rail - Installation

The screws and wall plugs supplied are only suitable for use in solid walls. If the wall is plaster board or soft building block use special wall plugs obtainable from most DIY stores.

Ensure there are no supply pipes or cables where you intend to drill.

Where possible, drill holes between ceramic tiles (in the grout). If drilling into ceramic tiles use a ceramic bit.

This product must always be used and fitted in such a way as not to cause water damage, therefore should be located and directed towards a suitable shower tray.

Take care to use power tools safely.

Carefully remove the cover (2) from the wall brackets (1) to expose the fixing hole.

Drill two 6mm diameter holes at 900mm centres ensuring the two holes are in line vertically.

To avoid cracking ensure the wall plugs are pushed all the way behind the ceramic tile.

Slide the bottom wall bracket (1) onto the riser rail (7) and insert the 64mm long screw (5) and secure to the wall.

Assemble the flexible tidy (3), handset holder (4) and the top wall bracket (1) onto the riser rail.

Slide the top wall bracket (1) along the riser rail until the 64mm long screw (5) can be inserted into the wall plug and the bracket secured to the wall.

Slide Rail - Installation

Tighten the screws to secure the brackets and riser rail to the wall.

Assemble the end cap (6) into the ends of the rails.

Fit the covers (2) to the top and bottom brackets.

Ensure the sealing washers (9) are inserted into both ends of the flexible hose (10) and connect the hose to the handset (8).

Screw the flow regulator (11) onto the shower valve using the sealing washer (9) and connect the flexible hose (10) onto the flow regulator.

Turn on the shower valve and check joints for leakage.

Aftercare

Twyford riser rails and handsets have a high quality finish and should be treated with care.

An occasional wipe with a mild washing-up liquid on a soft damp cloth followed by a thorough rinsing is all that is required.

The nozzles in the hand set should be cleaned periodically to remove any build up of debris or deposits which may affect the performance of the shower.

Twyford Guarantee

At Twyford, we want to make things as easy as possible for our customers. That's why we design products that are easy to fit and use, and that are quality tested to make sure they won't let you down. It's also why we offer solid guarantees on all products, effective from the date of purchase, to give you peace of mind.

Twyford mixer taps are covered by a parts only **2 year guarantee**.

Guarantee Terms and Conditions

This guarantee is in addition to your statutory and other legal rights and is subject to the following conditions:

- The product was purchased within the United Kingdom or Republic of Ireland.
- The guarantee applies solely to the original purchaser with proof of purchase.
- The installation must allow ready access to all products for the purpose of inspection, maintenance or replacement.
- Repair under this guarantee does not extend the original expiry date. The guarantee on any replacement parts or products ends at the original expiry date.
- Any part found to be defective during the guarantee period will be replaced without charge, providing that the product has been installed in accordance with the instructions given in this guide and used as the manufacturer intended.

The guarantee does not cover damage or defects caused by:

- General wear and tear (including special non-chrome finishes; components such as filters, seals, 'O' rings and washers).
- Incorrect installation.
- Repair using non-Twyford parts
- Accidental or wilful misuse
- Corrosion and the use of inappropriate cleaning products.

- System debris including the build up of limescale (which can be controlled through regular servicing and maintenance).

The guarantee does not cover compensation for loss of use of the product or consequential loss of any kind.

In the interests of continuous product improvement, Twyford reserves the right to alter product specifications without notice.

The Twyford Product Guarantee does not affect your statutory rights as a consumer.
