REGULATION (EC) NO 1907/2006 (REACH)

The products specified in the appendix

- Geberit insulation hose made of PE

do not contain any substances of very high concern (SVHC) at a concentration of above 0.1% by weight, in accordance with the current candidate list under Regulation (EC) No 1907/2006 (REACH).

MANUFACTURER NOTES

GEBERIT INSULATION HOSE MADE FROM PE

DGNB

Criteria catalogue: New building, version 2023, 4th edition
ENV1.2, Risks for the local environment

The aim is to reduce, avoid or substitute all hazardous or harmful materials, (construction) products as well as goods and mixtures that could adversely affect humans, flora and fauna or cause short-, medium- and/or long-term damage. The use of particularly environmentally friendly materials not only makes an important contribution to improving indoor air quality, but also helps to reduce the risk of pollutant-related remediation work on a building.

The products listed in the appendix meet the requirements of quality level 2.

No / item	Product type	Requirements for quality level 2	fulfilled
Line 43b	Insulation materials in building services	<i>No requirement</i>	

Criteria catalogue: New building, version 2023, 4th edition, ENV1.2 – Risks for the local environment

GEBERIT INSULATION HOSE MADE FROM PE

QNG

Appendix document 3.1.3, Avoidance of hazardous substances in building materials

Version 1.3, edition: 14/09/2023

Annex document 3.1.3 sets out detailed requirements for the ecological quality of construction products to ensure that materials with low levels of pollutants are used in buildings that are to receive the Sustainable Building Certification (QNG).

The products listed in the appendix meet the requirements of the Sustainable Building Certification requirements catalogue,

No / item	Construction product	Requirements	fulfilled
Line 12.2	Flexible synthetic foam insulation materials for building services	Free from halogenated blowing agents SCCP, MCCP, PBB and PBDE < 0.1%	

Sustainable Building Certification criteria catalogue: Avoidance of hazardous substances in building materials, appendix document 3.1.3, version 1.3, edition 14/09/2023

GEBERIT INSULATION HOSE MADE FROM PE

BNB

Profile 1.1.6, Risks for the local environment Appendix 1, version V 2015

The aim of the criterion is to reduce or avoid the use of building products as early as the planning phase that pose a potential risk to the environmental media of groundwater, surface water, soil and air due to their hazardous substance content or emission of hazardous substances, or that may cause health impairments due to accumulation in food chains or contamination of indoor air.

The products listed in the appendix meet the requirements of the BNB profile 1.1.6, Appendix 1, quality level 3, consolidated version 31.07. /16/08/2025.

No / item	Construction product	Requirements for quality level 2	fulfilled
Line 12.2	Insulation materials in building services	Free from halogenated blowing agents SCCP, MCCP, PBB and PBDE < 0.1%	

BNB criteria profile 1.1.6, Appendix 1, Risks to the local environment, consolidated version 31/07 / 16/08/2025
