✓ Application generally approved if the defined additional requirements are met in accordance with the footnotes

¹⁾ Einsatzbereich gemäss Technische Information (TI) "Aufbereitete Wasser"

²⁾ Usable negative pressure for Geberit piping systems:

The usable negative pressure is calculated on the basis of the air pressure at the place of installation minus the absolute pressure of 200 mbar.

Example: 980 mbar air pressure – 200 mbar absolute pressure = 780 mbar usable negative pressure in the piping system

³⁾ Malfunction temperature in accordance with EN 806-2: Tmal = 95 °C, total 100 h over the course of the service life

⁴⁾ Malfunction temperature in accordance with ISO 10508:2006: Tmal = 100 °C, total 100 h over the course of the service life

⁵⁾ Higher temperatures after Geberit approval only

⁶⁾ 10 bar/1000 kPa for MasterFix and MeplaFix

⁷⁾ Following Geberit approval

⁸⁾ Application range according to TI "Treated Waters"

⁹⁾ pH value ≥ 7.0 permissible in connection with brass

¹⁰⁾ Oil purity class in accordance with ISO 8573-1:2010E; for details on moisture and particles, see Technical Information "Geberit Piping Systems for Compressed Air Installations"
